PROFESSIONAL SUMMARY

Senior Backend Engineer with **7+ years** building high-throughput, production-grade systems for fintech, EV, and social media startups. Deep expertise in **Go** and **Node.js (Javascript, TypeScript)**, **Python** and **data modelling** across MySQL, PostgreSQL, MongoDB, and Redis. Proven record scaling a **UPI payment system to 5 lakh+ transactions/day within 6month of launch**, owning PII security and end-to-end API design. Experienced leading small teams and driving 0-to-1 product journeys.

Core Technical Skills

Languages:	Go (Golang), TypeScript, JavaScript, Python, Java, C++
Frameworks:	NodeJs, NestJs, SailsJs, Java Springboot, Django, Fast API, Django Admin, Sequelize, Prisma ORM, GraphQL (Apollo)
Architecture:	Domain-Driven Design (DDD), Hexagonal layered, Event-Driven, Microservices, REST API
Databases:	MySQL, PostgreSQL, MongoDB, Redis – schema design, indexing, query optimisation, data modelling
Messaging & Jobs:	AWS SQS, Firehose, RabbitMQ, Temporal Workflows
Cloud & DevOps:	AWS (Lambda, EC2, S3, SQS, Firehose, Secrets Manager, KMS, CodeBuild), Kubernetes, Docker
Security:	Envelope encryption, AWS KMS multi-region, PII protection, AES microsecond local enc/dec compatible with AWS KMS
Testing & Tools:	Testify (Go), Mockito, Git, Claude Code

Education

B.Tech, Computer Science & Engineering Malaviya National Institute of Technology (NIT), 2014 – 2018
Jaipur

Professional Experience

Senior Software Engineer | KreditBee

Nov 2024 – Present (1 yr 6 mos)

Bengaluru, India

- Architected a **UPI payment platform from scratch** in **Go** – PSP onboarding via **Juspay**, account fetching, and Juspay–NPCI communication – using **Domain-Driven Design (DDD)** with hexagonal layering.
- Wrote Payments **Send money, collect requests, txn history, callbacks, Account Management**
- Built **callback workers handling 5 lakh+ transactions/day** with idempotency, retry logic, and dead-letter queues via **AWS SQS** and Firehose.
- Implemented **envelope encryption** for PII: microsecond-latency AES enc/dec, **AWS KMS**-compatible, with multi-region decryption support.
- Leveraged **Temporal Workflows** for distributed crons, retry-safe jobs, and long-running async payment flows.
- Managed deployments on **AWS** (Lambda, EC2, S3, Secrets Manager, CodeBuild) and **Kubernetes**.

Software Engineer – Backend | CheQ Digital

Dec 2022 – Apr 2024 (1 yr 5 mos)

Bengaluru, India

- Built a **rule-based rate limiter** (fixed & sliding windows) for earning points and voucher redemptions;
- Authored an **npm PII Encryption library** used org-wide; migrated personal data across **8 microservices**.
- Built a **Mock Server** for 5 payment gateways and Credit Bureau (Experian), cutting QA third-party API costs.
- Mentored **4 junior developers and interns**: story breakdown, code reviews, KT sessions.
- Stack: **Node.js, NestJS, TypeScript, MySQL, MongoDB, Redis, RabbitMQ**

SDE II – Backend | ClearTax India

Jun 2021 – Nov 2022 (1 yr 6 mos)

Bengaluru, India

- Developed **ClearOne** core APIs (inventory, print, invoices) with **90% unit test coverage**; optimised DB queries for peak tax-season traffic.
- On-demand data extraction via **Python & MySQL** for product team; cross-team liaison for platform dependencies.
- Stack: **Java Spring Boot, Python, MySQL, Redis, AWS S3**

SDE I / SDE II – Backend | Yulu Bikes

Aug 2019 – Jun 2021 (1 yr 10 mos)

Bengaluru, India

- Built **fleet operations tools** (bike relocation, battery swapping, zone management) and **real-time map features** for live bike/charging station tracking.
- Contributed to Yulu Customer App, Dashboard, and Web/Mini Apps; wrote 2 mini dashboards for ESP & Cluster Managers.
- Stack: **Node.js (SailsJS), Java Spring Boot, Python, MySQL, Redis, AWS**

Backend Engineer | mymandir.com

Aug 2018 – Aug 2019 (1 yr)

Bengaluru, India

- Built REST APIs for **MyMandir** (5M+ downloads), Barfi (chat-fiction), and Eka (meditation) from scratch; replaced Ruby on Rails admin with **Django Admin**.
- Stack: **Node.js (SailsJS), Python, Django Admin, MySQL, Redis, AWS**

AI-AUGMENTED ENGINEERING (SDLC) – CLAUDE CODE

For my daily tasks i take leverage of **Claude Code's AI Agent** with its **superpower brainstorming mode**, **writing plan docs** as per Product Requirement, **executing plan doc** for implementation and **reviewing PRs**, Finding Bugs, Writing tests
